

# Society of Light and Lighting

**Residential Lighting: 16 February, 2010 (6pm (Refreshments from 5.30pm))**

Darwin Biochemistry Lecture Theatre, Darwin Building, UCL, Gower Street, London WC1E 6BT

**Speakers:** Rebecca Weir and Benedict Cadbury

Rebecca spoke on the biological, visual and emotional effects of good lighting design practice within the home. This lecture was warmly received by both academics within the industry and lighting engineers and designers.

**About SLL:** The Society of Light and Lighting acts as the professional body for lighting. It has over 2000 members in the UK and worldwide, and carries out a full range of activities. The Society is a company limited by guarantee which is controlled by CIBSE.

The Society of Light and Lighting is the senior and largest professional body in the UK representing the interests of those involved in the art, science and engineering of light and lighting in their widest definition. Although it was formed only in 1999, the Society builds on over 90 years of history. Its origins go back to the formation in 1909 of the Illuminating Engineering Society which had the aim of considering all applications of natural and artificial light.

The SLL welcomes all those who contribute to the world of light and lighting: lighting designers, lamp and luminaire manufacturers, sales people, consultants, installers, facilities managers, ergonomists, interior designers, ophthalmologists, architects, physicists, entertainment lighting specialists; in fact anyone who has an interest in any aspect of light and lighting.
