

8 CENTRE OF ATTENTION

The majority of this room's space is devoted to the dining table, with a streamlined galley kitchen from Mowlem & Co. Instead of a conventional splashback, mirrored glass panels reflect the light and increase the sense of space in this part of the room.

9 LIGHT THE WAY

A dramatic chandelier over the table brings atmospheric light to the dining space, while sunken spotlights are the practical choice in the food preparation area, also designed by Mowlem & Co. Matching wood for the island, table, wall and door brings the scheme together. ▶
